

Structured Interview Note

Adverse Impact Investigation — Evidence Document

Reference No.	INT-2026-0042	Date Conducted	June 20, 2026
Interviewer	Sarah Mitchell, Senior Analyst	Role	HR Compliance Analyst
Interviewee	[Name Withheld — ID: EMP-1087]	Department	Operations
Related Audit	Q2 2026 Adverse Impact Review	Duration	45 minutes

Purpose

This interview was conducted as part of the Q2 2026 Adverse Impact Investigation into hiring selection disparities identified in the Operations department. The interview sought to gather qualitative information regarding the candidate evaluation criteria applied during the relevant hiring cycle (January–March 2026).

Summary of Discussion

The interviewee, a current Operations team member hired in Q4 2025, confirmed that the interview panel for their position consisted of two hiring managers and one HR representative. When asked about the evaluation criteria used, the interviewee recalled that candidates were assessed on technical aptitude, availability for shift work, and performance on a timed written assessment.

The interviewee noted that no formal rubric or scoring sheet was provided to candidates prior to the assessment. They also indicated that results from the written assessment were the primary determinant for advancing to a final panel interview, with a reported cut score of 75%.

Key Findings from Interview

- The written assessment cut score of 75% was applied uniformly; however, no documentation of the validation study supporting this threshold was produced.
- The interviewee was unaware of any structured training provided to panel members on avoiding unconscious bias during evaluations.
- Shift availability was listed as a requirement but the interviewee noted it was discussed informally rather than as a formally weighted criterion.

Analyst Observations

The information provided is consistent with quantitative findings showing a 0.67 impact ratio for female applicants in the Operations hiring cycle. The absence of a validated cut score and informal application of shift availability criteria represent potential contributing factors to the observed disparity and warrant further investigation.

Next Steps

— Request documentation of assessment tool validation from HR Records — Obtain written assessment score distributions disaggregated by gender from HRIS — Schedule follow-up interview with Hiring Manager (ID: MGR-0234) — Attach this note as evidence to Finding FND-2026-007
